

Task : Create A Cloud Object Storage Service

The screenshot displays the IBM Cloud Object Storage console. The left sidebar contains navigation links: Cloud Object Storage, Storage instances, Cloud Object Storage-h3, Buckets (selected), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area is titled 'Buckets' and includes a description: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table with columns: Name, Public access, Location, Storage class, and Created. A single bucket is listed with the name 'samplestore132', public access 'Yes', location 'jp-tok', storage class 'Standard', and creation time '2022-11-08 7:51 PM'. A 'Create bucket' button is visible in the top right of the table area. The bottom of the image shows a Windows taskbar with the search bar and various application icons.

Name	Public access	Location	Storage class	Created
samplestore132	Yes	jp-tok	Standard	2022-11-08 7:51 PM

Created successfully.
